

# NATIONAL CRITICAL INFORMATION INFRASTRUCTURE PROTECTION CENTRE

## NCIIPC ALERT ON JUDY MALWARE

A new malware named "**Judy**". The Malware is infecting Android apps and largest malware campaign found on Google Play so far. The Malware is infecting 41 Apps developed by a Korean company. Judy bypass Google Play's Protection called Bouncer. The Hackers developed a seeming benign **bridgehead app**, to establish connection to the victim's device, and insert it into the app store.
